

AADITYA BAGDE

AI/ML Engineer (Entry-Level) · Frontend Developer

Bhopal, MP | +91 7722912906 | bagdeaaditya507@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Python · React.js · Machine Learning · REST APIs · Git/GitHub · FastAPI

SUMMARY

AIML undergraduate with hands-on experience building full-stack applications and machine learning models. Built and shipped a mood-based music recommender and a multi-language translator app, and contributed to measurable performance improvements (~30% faster load time, ~15% faster API response) during a front-end development internship. Familiar with the end-to-end workflow across React/Tailwind on the front end and FastAPI/Pandas/Scikit-learn on the ML side.

EDUCATION

B.Tech, Artificial Intelligence and Machine Learning | Bansal Institute of Science and Technology, Bhopal 2024 – 2028

- CGPA: 7.86 (through 3rd Semester) — relevant coursework: Data Structures & Algorithms, Machine Learning, Python Programming

TECHNICAL SKILLS

- Languages: Python, C++, C, JavaScript (ES6+)
- Frontend: React.js, JSX, Tailwind CSS, HTML5, CSS3, React Router DOM, Axios, responsive/cross-device UI
- ML & Data: Pandas, NumPy, Matplotlib, Scikit-learn, PyTorch, data preprocessing, model training & evaluation
- Backend & Tools: FastAPI, REST API integration, MySQL, Git, GitHub, VS Code
- Practices: version control workflows, debugging & root-cause testing, performance optimization

PROJECTS

Music Mood Recommendation System | React.js, Tailwind CSS, Scikit-learn

Apr 2025

- Delivered a mood-based song recommender by combining a React/Tailwind front end with a Scikit-learn recommendation model, translating user input into personalized playlist output.

Text Translator App | React, JavaScript, Axios, Rapid API

Feb 2026

- Built a multi-language translator supporting real-time text conversion by integrating Rapid API and Axios with React Router DOM for navigation, then extended it with a random-string generator utility and a Tailwind-styled UI.

EXPERIENCE

Front-End Development Intern | Qskill Program, SR INDIA

Jan 2026 – Feb 2026

- Improved cross-device load performance by ~30%, as measured by responsiveness benchmarks across mobile and desktop, by rebuilding core UI components in React.js and Tailwind CSS.
- Reduced API data-fetch time by ~15%, as measured by response latency, by integrating Axios and React Router DOM for client-side navigation and REST API data handling.
- Strengthened debugging accuracy and turnaround time, as measured by faster issue resolution in live sprints, by applying systematic root-cause testing during real client project work. (Certificate ID: qsfndw202601846)

Machine Learning Intern | Happieloop Technologies

May 2026 – Jun 2026

- Increased model reliability, as measured by cleaner training data and fewer preprocessing errors, by building structured data-cleaning pipelines in Python with Pandas and NumPy.
- Improved model iteration speed, as measured by faster train/test cycles, by developing and evaluating classification models with Scikit-learn following standard ML workflows.

CERTIFICATIONS

- Python for Data Science — NPTEL (71%)
- C++ Programming Basics — Simplilearn
- Data Structures in C++ — Scaler
- HTML, CSS & JavaScript Essentials — Cisco Networking Academy
- Implemented 10+ core DSA algorithms in C++/Python and built 10+ ML models with Pandas, NumPy, Matplotlib, and Scikit-learn — full history on GitHub.
